

Title: Web Interface

Primary Actor: User

Goal in Context: Successfully submit a package to Ninkology using the web interface.

Preconditions: Open web browser and internet connection.

Stakeholders and Interests:

1. User
 - a. Can access the website <http://localhost/installed directory/>

Main Success Scenario:

1. User navigates to: <http://localhost/installed directory/>
2. User chooses a file/archive to upload to Ninkology.
3. User then hits the submit button.
4. User will then have the option to submit another file or look at jobs Ninkology is processing.
5. Once the submitted job is done, the job table will be updated with a link to the license file for the scan completed.
 - Note: Web interface scanned files are saved in the results directory.

Failed End Condition:

1. Browser not compatible
2. Invalid Email
3. Package name with invalid characters (ex: *, : , ^ , etc...).

Trigger:

1. User navigates to: <http://localhost/installed directory/>
2. Click submit.

Notes: Web page may look different depending on what web browser you are using.
